HP 51626 Black Inkjet Print Cartridge**Recommended Catalogue Copy**

The HP 51626 Black Inkjet Print Cartridge is available in two ink capacities. As well as the original HP 51626A (40 ml), an additional cartridge, the HP 51626G "Light User" (20 ml), has been introduced for the occasional user. These, together with a twin pack, HP 51626T (2 x 40 ml), give customers an optimum choice of cartridges to more closely match the right cartridge capacity to their printing needs.

Both capacity cartridges have the same external dimensions to fit the same printers, with a drop-in, snap-out action for quick, clean and easy replacement. However, for high-volume office printers, such as some HP DeskJet, HP DesignJet and HP OfficeJet Printers, HP recommends the HP 51626A Large Black Inkjet Print Cartridges (40 ml). These print cartridges deliver the best value and convenience for high-volume users.

Although having different capacities, all cartridges contain the same high-quality HP custom-designed, high-density, dye-based ink, delivering optimal print quality.

The HP 51626A (40 ml) produces on average 794 pages at 5% density and on average 1056 pages at 3.75% density. The HP 51626G (20 ml) produces on average 397 pages at 5% density and on average 528 pages at 3.75% density.

Target Market/Sales Message

The HP 51626 product range gives customers a comprehensive choice of cartridge capacities to more closely match their printing needs.

The HP 51626G "Light User" Black Inkjet Print Cartridge (20 ml) is ideal for the price-conscious occasional user who consumes less black ink and/or wants a lower out-of-pocket expense.

The HP 51626A Large Black Inkjet Print Cartridge (40 ml) is the ideal choice for the frequent HP DeskJet, HP DesignJet, HP DeskWriter or HP OfficeJet user who wants cost-effective, large-volume, clear, sharp output.

For the frequent home or small business user requiring multiple cartridges, the HP 51626T (2 x 40 ml) twin pack offers outstanding value for money and convenience.

An "Install before" date featured on all cartridge boxes helps to ensure that cartridges are used when they are fresh enough to deliver optimum results.

As well as giving cost and user advantages, the choice of cartridge capacity reduces the risk of ink wastage through insufficient use.

Reseller Benefits

With increased choice comes increased opportunity for the reseller - more frequent purchases of smaller volume cartridges will generate more traffic, while money saved may be used for other in-store purchases. And in terms of space planning, twin packs sell the same amount of ink in less space than you would need for two HP 51626A (40 ml) cartridges.

Product Information

HP Product No.	Colour	Ink Volume
HP 51626A	Black	40 ml
HP 51626G	Black	20 ml
HP 51626T	Black	2 x 40 ml

HP 51626A, HP 51626G and HP 51626T Black Inkjet Print Cartridge Products

Product Compatibility

The HP 51626A and HP 51626G Black Inkjet Print Cartridges are compatible with the following HP printers:

- HP DeskJets: DeskJet Plus, 400, 400L, 420C, 500, 500C, 510, 520, 540, 550C, 560C
- HP DeskWriters: DeskWriter C, 510, 520, 540, 550C, 560C

The HP 51626A is also compatible with:

- HP OfficeJets: LX 350C
- HP DesignJets: 200, 220, 600

Product Information

The HP 51626A Large Black Inkjet Print Cartridge (40 ml) gives users of printers and all-in-one products, whether at home or at work, a convenient size choice to fit frequent printing needs. The HP 51626G “Light User” (20 ml) allows low-volume users to choose the right cartridge to match their anticipated printing needs. The HP 51626T (twin pack) contains two 40 ml HP 51626A cartridges.

Ink Type

- High-density dye-based black ink

Number of Nozzles

- 50

Print Resolution

- 600 x 300 dpi

Average Pages Per Cartridge

- HP 51626A (40 ml): 794 pages at 5% density; 1056 pages at 3.75% density
- HP 51626G (20 ml): 397 pages at 5% density, 528 pages at 3.75% density

Media Compatibility

The HP 51626 Black Inkjet Print Cartridges deliver clear, sharp results on plain paper. For best results and even more printing project ideas, recommend these HP Papers and Films. Remember, always confirm media compatibility for specific printer models by consulting the media box or the HP Supplies Reference Guide.

- HP Bright White Inkjet Paper
- HP Premium Inkjet Coated Paper
- HP Premium Glossy Paper
- HP Premium Transparency Film
- HP Premium Inkjet Rapid-Dry Transparencies
- HP Photo Paper
- HP Greeting Card Paper
- HP Glossy Greeting Card Paper
- HP Printing Paper

Features and Benefits for End-Users

- Customers can choose the cartridge with the right amount of ink for their personal printing needs.
- The lower volume of ink in an HP 51626G “Light User” (20 ml) cartridge means that occasional users should be able to use up all of the ink before the expiry date.
- HP 51626G “Light User” (20 ml) cartridges appeal to price-conscious customers at the point of sale.
- HP 51626A (40 ml) cartridges deliver maximum productivity, convenience and low cost per page for frequent printer users.

Features and Benefits for Resellers

- Different cartridge contents and pricing alternatives offer higher margins and generate more in-store traffic for resellers.
- Twin packs sell the same amount of ink in less space than you would need for two HP 51626A (40 ml) cartridges.

Genuine HP Print Quality and Reliability

- HP technology and proprietary water-resistant black ink deliver optimal print quality.
- HP RealLife Imaging System – HP 51626 cartridges are designed to work together with HP Printers and HP Papers and Films to deliver results that are always clear, always sharp.

Single Drop-In/Snap-Out Cartridge

- Quick, clean and easy replacement.

Frequently Asked Questions

1. Why did HP add a low-volume print cartridge to the HP 51626 product range?

Hewlett-Packard recognises there are customers who want the reliability and print quality of HP Inkjet Print Cartridges, but require a lower out-of-pocket expense. Other users have lower-volume printing needs and simply require less ink. By offering lower-priced, lower-volume inkjet print cartridges, HP is able to offer a choice of print cartridges ideal for the price-conscious and/or occasional “light” printer user, while ensuring quality results. For the frequent printer user, HP continues to offer the HP 51626A Large Black Inkjet Print Cartridges (40 ml) and the HP 51626T (2 x 40 ml) twin packs that deliver clear, sharp output at a competitive cost per page. The HP 51626G “Light User” Black Inkjet Cartridge (20 ml) is ideal for the low-volume printer user.

With three convenient products from which to choose, HP printing supplies customers can select the inkjet print cartridge product that fits both their printing needs and their budgets.

2. With three products to choose from, how do I know what’s right for my customer?

Because printer usage is a matter of personal choice, HP now offers you a choice of three convenient black inkjet cartridge products to fit the personal printing needs of your customer.

If your customer is a low-volume user, the new HP 51626G “Light User” Black Inkjet Print Cartridge (20 ml) will provide a practical product at a lower out-of-pocket expense. This inkjet print cartridge is ideal for students or home printer users who occasionally use their printer to produce school reports, greeting cards or correspondence.

For frequent home or office printer users, the HP 51626A Large Black Inkjet Print Cartridge (40 ml) will provide the best value and convenience. It’s the ideal choice to create business reports, newsletters, correspondence, presentations and much more.

For the frequent home or small business user requiring multiple cartridges, the HP 51626T (2 x 40 ml) twin pack offers outstanding value for money and convenience.

3. Why does the new HP 51626G “Light User” Black Inkjet Print Cartridge have the same physical size as the HP 51626A Large Black Inkjet Print Cartridge?

The exterior dimensions of the new HP 51626G “Light User” Black Inkjet Print Cartridges (20 ml) are identical to the HP 51626A Large Black Inkjet Print Cartridges (40 ml) to allow both cartridges to properly fit the same products. The inside of the cartridges hold either 20 ml or 40 ml of ink as indicated on the cartridge label and box. Despite the similar appearance, you can be confident your HP 51626 Inkjet Print Cartridges will deliver the volume of ink you selected.

4. The print cartridge boxes look similar – how do I know which cartridge I’m getting?

Simply locate your HP Inkjet Print Cartridge product number on the front of the box. The new HP 51626G “Light User” Black Inkjet Print Cartridges (20 ml) are designated by the letter ‘G’ at the end of that five-digit number while the HP 51626A Large Black Inkjet Print Cartridges (40 ml) are identified by the letter ‘A’ following the five-digit number. The descriptor ‘Light User’ or ‘Large Black’ above the appropriate product number provides additional identification.
